Investment Strategy

Through our international fund management platform, we can invest at all stages of investment from venture through growth capital to late stage infrastructure from locations in the key markets of EMEA, Asia and the Americas.

Key aspects of our investment platforms

- Cash generative assets to develop with proven low cost capital exists
- Technological development businesses with management that have game changing products in energy, efficiency, materials, water and waste
- We focus on assisting investees to access international markets and apply technology transfer business expansion techniques, through our network of fund managers, contacts and experienced entrepreneurs
- Focus on areas where capital shortage is greatest
- We are expert at providing management with mentoring assistance that can help open minds and markets for lower risk expansion. Through our skills set we are able to turnaround poor performers and manage the exit process

Investment Philosophy and Drivers

- Energy independence and security
- Fossil fuel depletion, stranded assets, ‘peak oil’ and price volatility
- Water and resource scarcity
- Demand growth and increasing waste from population and developing economy expansion
- The falling cost of renewable energy generation and cost savings available from efficiency technologies
- Climate change being widely recognised as a foreseeable threat to both the global economy and political stability
- Nuclear power becoming an unpalatable alternative

Unique Benefits of SET3 Group

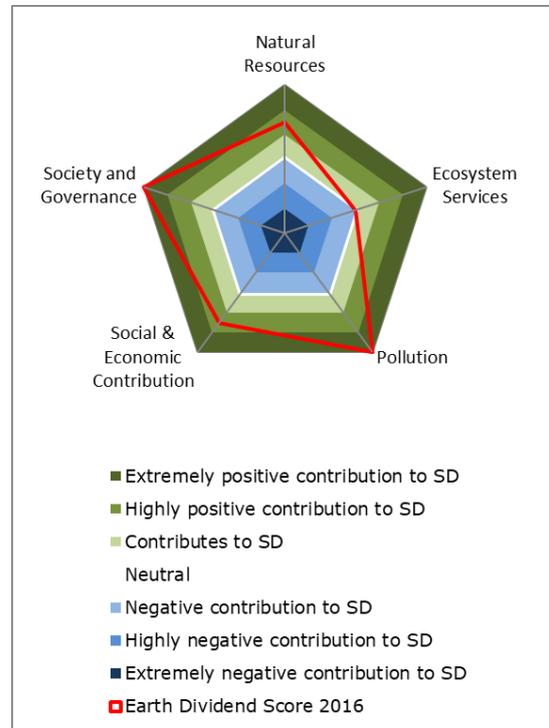

The **Nobel Sustainability Fund**® is an exclusive collaboration with the Nobel Sustainability Trust® (NST) a Nobel family embedded initiative which aims to:

- crystalize and extend global awareness and focus on environmental considerations and solutions,
- ensure ready access to renewable energy for all members of our society whilst ensuring the protection of the Earth

SET3 companies use a unique sustainability approach through the **Earth Dividend**™ annual reporting tool used to measure the contribution to sustainable development.

The report summarises performance across a range of sustainable development factors, as shown in the example diagram for Propelair.

Earth Dividend™ 2017 – Blackdog Biogas
